

Field Groups Chart

Optional

This form can be used to divide students into field groups for Tremont programming. Students should be divided as evenly as possible among the groups with no field group exceeding twelve students. For visiting groups doing Cooperative Teaching, two field groups will be paired together for each class. Lead teachers may of course choose their own group names, but please share these group names with the Youth Programs Coordinator so they can be accurately reflected on the trip schedule. Groups without assigned names will be given fun Smoky Mountain animal names by the Youth Programs Coordinator.
